Appendix A to the Invitation

Description of the Subject Matter of the Contract - PART I

Conducting an online public opinion survey as part of the GRIEG project "From Apathy to Violent Extremism: Motivational Basis of Political Engagement".

- 1) The subject of this contract is to conduct 15 surveys in the United States on a quota sample for variables such as age, gender, education, race/ethnic group, place of residence, which are detailed in Appendix A1 to the Invitation.
- 2) The Principal in Appendix A1 to the Invitation specified in detail which surveys cannot be performed on the same study group of individuals and which surveys can only be performed in desktop form (and not on a mobile device such as a phone or tablet).
- 3) The number of subjects should be selected for the survey with a given number in accordance with Appendix A1 - column "Sample Size". Individuals in a given survey number (column 2 of Appendix A1) can only respond once to a single survey response set (i.e., a person can participate only once in a given survey number). Responses can be assigned to only one person identifiable to the Contractor in a given survey number.
- 4) The Principal provides:
 - preparation of questionnaire-based surveys for the aforementioned studies prepared on a hosting platform (e.g. Qualtrics)
 - access to the platform solely for the purpose of carrying out the studies specified in the contract throughout the term of the contract.
- 5) The Contractor's responsibilities:
 - recruitment of respondents,
 - setting up, using researcher-prepared surveys on a hosted platform, those survey elements necessary to recruit respondents,
 - selecting and controlling the appropriate participants' quotas,
 - conducting surveys,
 - Control of the quality and reliability of the survey data (in accordance with ESOMAR standards), including verification of the truthfulness and reliability of the survey subjects' responses and that each set of responses in a given survey can be attributed to only one person identifiable to the Contractor.
 - handing over the full results in the form of databases to the Principal,
 - preparation of a description of the sample, the rate of return and a report on the implementation of the quotas, i.e. a report of the survey conducted, together with a statement that those taking part in the survey have responded only once (i.e., no duplication within a survey of a given number).
- 6) The Principal in Appendix A1 specified for each survey the maximum time to conduct the survey. The Principal is responsible for preparing the questionnaire for each survey. Surveys will include, for example, questions about political views and willingness to get involved in political causes and past involvement in such activities. In this sense, the surveys contain sensitive questions. In most cases, the surveys will not contain personal information about the subjects, the respondents remain anonymous. If, due to the research purpose, the survey will include a question about personal data, the questionnaire for such a survey will contain information about the processing of personal data. All surveys will be approved in advance by an ethics committee.
